Notice: This document is solely a fictional portfolio and RAG example. It is not legal advice, a binding contract template, or an insurance product.

Insurance and liability information sheet - fictional “Standard Plus” protection package

Component	Illustrative scope	Deductible
Motor liability	Protection against justified third-party liability claims under the underlying vehicle insurance.	no contractual renter deductible
Vehicle damage / CDW	Contractual liability reduction for accidental damage to the rental vehicle.	EUR 1,000 per loss event
Theft / Theft Protection	Contractual liability reduction in the event of vehicle theft, provided obligations are complied with.	EUR 1,000 per loss event
Glass, tyres, rims	Under Standard Plus only covered if damage results from an insured accident event; isolated damage is not included in this example.	depending on damage type
Roadside assistance	Organization of roadside assistance and towing for technical defects; consequential costs depend on the specific case.	EUR 0 for organization

1. Classification of this document

For portfolio purposes, this information sheet describes the contractual allocation of risk between a fictional car rental company and the renting person. It replaces neither an actual insurance policy nor insurance terms. In a real case, the vehicle owner's motor liability insurance is governed by the actual insurance contract and statutory requirements.

2. Liability towards third parties

Damage caused to third parties through use of the vehicle is settled under the existing motor liability insurance. The German Compulsory Insurance Act generally requires liability insurance for vehicles normally based in Germany that are subject to compulsory insurance. This information sheet deliberately does not state fictional coverage limits as binding insurance data.

3. Liability reduction for the rental vehicle

The Standard Plus protection package reduces the renting person's contractual liability for insured vehicle damage to EUR 1,000 per loss event. The liability reduction applies only to damage covered by the described protection and properly reported.

4. Theft protection

In the event of theft, contractual liability in this sample scenario is reduced to EUR 1,000 per loss event. In particular, vehicle keys and available vehicle documents must have been kept securely and the theft must be reported immediately to the police and the lessor.

5. Typical exclusions or grounds for reduction

Liability reduction may in particular cease to apply or be reduced if damage is caused intentionally. In cases of gross negligence, driving under the influence of alcohol or drugs, use by unauthorized drivers, prohibited races or serious breaches of claims-reporting duties, liability is governed by the provisions effectively agreed in the specific contract and permitted by law.

Not automatically covered in this example are: loss of personal belongings, pure operational and wear damage, misfuelling, loss of keys, interior damage without an accident event, and isolated damage to tyres, rims or glass unless additional protection has been agreed.

6. Conduct in the event of a claim

1. Secure the accident scene and call emergency services if necessary.
2. Call the police in the event of personal injury, significant property damage, theft or an unclear accident sequence.
3. Inform BeispielMobil immediately via the 24/7 hotline +49 000 123456-99.
4. Document parties involved, registration numbers, witnesses and the damage.
5. Do not arrange repairs or admit liability without consultation unless an emergency requires otherwise.

7. Example deductible calculation

Repair costs for an insured accident loss: EUR 3,400. With effective Standard Plus protection and no ground for reduction, the renting person's contractual contribution in this example is capped at EUR 1,000 for this loss event. Further independent loss events may each trigger a new deductible.

8. Statutory reference framework

The German Compulsory Insurance Act serves as the statutory reference framework for mandatory motor liability insurance. The specific coverage, deductible and contractual liability reduction of a car rental company are, however, determined by the respective insurance and rental contract documentation. This document is only a synthetic RAG example.
